PUZZLED BY TECHNOLOGY? CIT's solutions are the perfect fit!

Offering the best in hardware, software, services and technical support from one convenient source—CIT's cutting edge capabilities give you more options!

Hardware Products & Services

- Local and wide area network design, hardware and implementation
- Computer networking services (break-fix, project and contract)
- Information systems and staff augmentation services
- Technical support call center
- Technology recycling services - pickup and disposal, hard drive data destruction

Comprehensive Business Analysis

- Provide specialized help so businesses can achieve and sustain their competitive advantage
- Improve efficiency by redesigning information systems
- Create effective operation controls
- Manage the installation of data processing systems

Training

- Courses in Microsoft Office, SharePoint and other applications
- 3.5 hour standard courses—introduction, intermediate and advanced levels
- 90-minute specific topic courses, such as Microsoft Word Mail Merge
- One-on-one consulting and executive mentoring
- Standard application customization and/or custom courseware development for your complex software packages or proprietary software
- Online training via WebEx™

Software Development & Products

- Application development
- Internet/intranet solutions, including graphic design and web server management
- Comprehensive SharePoint consulting
- Database development, conversion and migration
- Business Intelligence
- Staff sourcing
- Project management

Cabling

- Voice and data infrastructure installation and service
- Fiber installation and termination
- Move, add and change services (MAC)
- Low voltage licensed and bonded
- Planning and certification

Managed Services

- CIT Optics—proactive, 24 hours a day, seven days a week system monitoring
- Hosting—web hosting and virtualization services with standard and optional features for all types of websites and applications
- Co-location—house and protect your servers or other hardware in a secure and monitored offsite location
- Data vaulting—guaranteed data backup and recovery
- Onsite and remotely managed servers and desktops

EXPERIENCE

Court facility planning and design has been a focus of BKV Group since it was founded 33 years ago. Our firm and staff have completed over 43 court studies and facility designs that includes over 230 courtrooms. Many of these projects have been recognized for innovative design and sustainable solutions. Our knowledge covers district, state and federal court facilities locally and nationally.

BKV is a full service firm where we can provide complete in-house support for landscape, interior design and structural, mechanical and electrical engineering.

Some of our Minnesota Court projects include:

Pine County / Freebom County / Isanti County / Winona County / Le Sueur County / Nicollet County / Todd County / Houston County* / Blue Earth County* / Hennepin County* / Douglas County* / Mille Lacs County* / Pope County* / Pennington County* / Hubbard County*

(*indicates staff projects completed while with a previous firm)

COURT PLANNING

One of BKV's key strategies when working with clients is an involved collaborative process where all ideas are explored to develop the best and most appropriate solutions. In this process, some issues we examine are:

- Customer service and access
- Weighted caseload as it relates to long term space needs
- Space utilization and flexibility
- Security controls and scanning
- Separating movement and contact of public, staff and inmates
- Jury movement and space requirements
- Staff movement, space requirements for operational efficiency
- Chamber space and relationship to courtrooms
- Current Court and record technologies
- Courtroom size based on proceedings
- 3D images for Courtroom layout and sight lines
- Facility tours

LONG-RANGE VISION

Since the founding of our country, the judicial system and the values it represents has been a critical element in the development of our nation. The County courthouse was a part of the head of the community, located in the town square next to the church. This symbology continues to be a value in our Government Centers that shapes and influences our community's built environment. We recognize these values and work hand in hand with our clients to design facilities that represent the values of the community to create a long-lasting and enduring facility.

At BKV Group, the desire for a long-range vision is achieved through:

- Graphic Model development
- Committee/Design Team workshops
- Broad-based Community visioning workshops
- Collaborative consensus of County/Community Values and aesthetic goals
- Developing a multi-year Master Plan/Feasibility Study for potential future needs
