Mid & South Dining Hall –
Cragun's Resort
Brainerd, MN

2023 Vendors Thank You for Participating!

GOLD VENDOR:

Advanced Systems Integration (ASI)

412 Gateway Blvd Burnsville, MN 55337 763-732-2053

info@asi-mn.com

Meet: Brandon Carleton & Brian Rutz

ASI provides custom audio/visual solutions with an emphasis on courtroom technology. The company has helped develop and maintain standards across multiple judicial districts. ASI holds a Master Purchasing Agreement with the 7th Judicial District that can also be used for all other Districts in Minnesota.

YOUR COURTROOM TECHNOLOGY PARTNER

Built from over a decade of experience working for a variety of AV integration firms, ASI was formed in direct response to the lack of standardization, testing, and efficiency within the local industry. Since its inception in 2011, ASI developed its own set of policies and procedures to create a new standard for quality and client satisfaction.

The ASI Difference

- Velcro is used instead of cable ties to prevent damage to low-voltage cabling.
- To ensure cable integrity, ASI follows IT industry standards requiring category cables to be terminated using keystones and patch cords, allowing for proper cable testing and long term system operation.
- Every technician is assigned a Fluke Networks cable tester to verify signal quality, not just continuity, of all category cables.
- All displays and projectors are tested in-house before installation, drastically reducing the amount of time needed to complete a project.
- ASI invests in quality audio/video commissioning tools to ensure the end product works as specified.
- After installation, project checklists and client sign-off are completed by ASI staff to ensure system is working properly and client is pleased with the end result.
- ASI believes in developing standards across judicial districts, allowing for operational consistencies, ease-of-use and troubleshooting.

Meet: James Meder & Amanda Hokom

Secure Imaging Services

THE PROBLEM

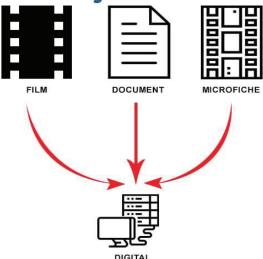

A filing room full of file cabinets and documents. Finding the right documents is expensive. Misplaced documents cause service interruptions and cost you money. Plus old Microfilm readers are becoming obsolete.

THE SOLUTION

River City Data. For more than 3 decades, River City Data has handled documenting needs for a wide variety of clients, including county court systems, hospitals, schools, and private organizations. Our services include:

- **Premier Document Scanning Service in MN** 250,000+ documents each week.
- Document Preparation for Digital Conversion to ensure the best quality image that your document can provide.
- Document Indexing using Kofax Capture, Digitech Paperflow, and proprietary software.
- Microfilm Conversions to Digital for easy access. We can handle Microfilm, Microfiche, and Aperture cards
- Book conversions to any Digital Format.
- E-Book Conversions for today's electronic book readers.
- 35mm slide conversions to digital images.
- All services are completed to industry standards in open formats. Nearly any image that you need, we can produce. You will never be tied to proprietary software.
- All digital conversions are completed to the "Western States Digital Imaging Best Practices".

River City Data - Future Solutions Today

Wold Architects and Engineers
